"We're Gonna Be in the Hudson": Risk Management Expertise to Live by in an Economic Downturn

For leaders of corporations, risk management has become a top concern in the face of increasing demand for greater corporate accountability as well as world events that have changed the risk landscape and its impact on the business world.

Leadership: Part I -- Cracking the Code for Today's Project Managers

What kind of project manager do you need to be in an economic downturn? Project management, especially in the changing world of a recession, is challenging work. Just when you are feeling most pressured and vulnerable, you need to be strongest and most generous in mind and spirit. So what makes a great project leader?

Leadership: Part II -- Connecting the Future to the Present

Have you suffered personal turmoil in applying conventional project management approaches only to fall short of expectations more often than you would like? Do you suspect that having successful projects under your belt is not quite enough to be a top-performing project manager? What more is required of today's project managers to evolve to the next level in a new decade?
